- Pride Media

PROJECTS

ESPRESSO FEEDS

- Radio Player – React Native

The ultimate mobile companion for exploring and curating your favourite UK radio stations. Discover and save a diverse range of radio feeds, effortlessly creating personalized playlists that cater to your musical tastes.

CHECKED IN PLUS

- Workforce System – Vite / PWA

Checked In Plus leverages geolocation to facilitate user check-ins coupled with an intuitive user-friendly interface adapted for mobile use. It utilizes a headless architecture which allows for seamless customization across diverse industries.

PROFILE

I've built a variety of skills from social etiquette and working relationships in the leisure industry to technical knowledge and management experience in sales & tech. I'm a commercially astute developer eager to evolve my passion into a professional career. I have a high task orientation with wide experience in delivering to user standards. I feel my speaking disability, stammer has only amplified my ability to be a strong communicator. I'm a member with the BCS institute, Sheffield.Digital and I regularly attend the Front End Sheffield event.

EXPERIENCE

FOUNDER / FULL STACK DEVELOPER

- LiteRECORDS – Web Community

Exemplifying expertise and leadership as the Founder and Full Stack Developer at LiteRECORDS, I have spearheaded the dynamic evolution of our platform through my proficiency in HTML, CSS, and JavaScript. Operating within the demanding realm of vBulletin software, I have effectively managed a thriving community of over 33,000 users. Additionally, I have taken charge of the intricate server infrastructure, configuring and maintaining CentOS servers as well as harnessing the power of Sphinx and WHMSONic software to optimize system performance.

ASSOCIATE CONSULTANT / DEVELOPER

- Flood I.T. Support – Manchester, GB

I actively contributed to the organization's innovative strides in research and idea generation and collaborating closely with the development team. My key focus revolved around crafting and implementing strategies to elevate and optimize interfaces for the diverse range of clients. In addition to my technical contributions, I also assumed a pivotal role in knowledge dissemination, where I organized and hosted engaging digital marketing workshops. These sessions delved deep into the multifaceted world of social media, equipping a comprehensive understanding of its advantages and effective utilization strategies.

FRONT END DEVELOPER (CONTRACT)

- The Developer Academy – Sheffield, GB

'Warm & Safe' is highly functional and responsive using React.js and Leaflet.js, seamlessly interfacing with a REST API Node.js backend, ensuring accessibility and optimal user experience through React-Icons and adherence to UX best practices. My adaptability was showcased as I orchestrated a smooth migration from MongoDB to CosmosDB on Azure for enhanced scalability. Working within a dynamic Agile team, I met tight deadlines and contributed to the deployment of over 3,000 warm spaces across the UK to positively impact lives.
